

## Winner of Coach Engineer of the Year

Supported by

---

# Paul Murdoch

## of Golden Boy Coaches

### Judges comments:

'Our winner told the judges: "If a vehicle were to fail I would consider that a personal failing." Paul is Chief Engineer and Workshop Manager of Golden Boy Coaches and its associated company, GB Fleet Maintenance Ltd. He took over responsibility for running the workshop in 2001, aged 25, and is particularly proud of the company's VOSA Initial Pass Rate, which is 100% against a current national average of 80.8%. Having extended its workshop services to third parties under GB Fleet Maintenance, the company is an approved supplier to Van Hool and provides a maintenance service to a growing number of other operators.'
